EVS2 Video Technology

Our EP-LT Series with Enhanced Video Signal (EVS2) provides the highest compatibility with CCTV equipment for enhanced video clarity. Unlike flat panel monitors designed for the PC industry, EVS2 enabled monitors will not experience dropped signals as a result of video signal hunting. Dropped signals and poor composite video quality have made most flat panel monitors (designed for the PC industry) difficult and undesirable to use with multiplexers and digital recorders. AGNPRO CCTV monitors are designed specifically for demanding video surveillance applications.
